

WELCIDE

BIOCIDE

DESCRIPTION

WELCIDE is a granular sodium pentachlorophenate type bactericide.

Active Ingredients:

Sodium Pentachlorophenate 79%

Sodium Salts of other Chlorophenols 11%

Inert Ingredients 10%

TOTAL 100%

APPLICATION

WELCIDE is used to prevent bacterial growth in drilling fluids, packer fluids, and underground strata.

RECOMMENDED TREATMENT

Add as a concentrated aqueous solution at the rate of .25 to 0.5 lb of WELCIDE per bbl of drilling mud or packer fluid. Maintain 15 to 40 ppm in underground flooding waters.

SAFETY AND HANDLING

WARNING: Harmful dust - Causes skin irritation, injuries to eyes - May be harmful or fatal if swallowed or absorbed through skin - Do not get in eyes, on skin or clothing; Do not take internally; Do not breathe dust; Wear chemical workers goggles when handling; Wash thoroughly after handling; For industrial use only; Keep package tightly closed when not in use.

If swallowed, induce vomiting by sticking finger down the throat or by giving an emetic such as two tablespoons of salt in a glass of warm water. Never give anything by mouth to an unconscious person. In case of eye contact, flush eyes immediately with plenty of water for at least 15 minutes and get medical attention. In case of skin contact, wash with soap and plenty of water. Wash contaminated clothing before reuse. This product is a metallic stimulant. Causes hyperthermia. Treat symptomatically.
