

MESUCO-FIBER

CELLULOSE FIBER LCM

DESCRIPTION

MESUCO-FIBER is a product composed of strong natural fibers of varying diameters and lengths for maximum plugging of zones of lost circulation.

APPLICATION

MESUCO-FIBER is designed for the elimination of lost circulation resulting from cracks or fissures. The fibers are strong and resilient; therefore, they will not readily disintegrate during circulation.

RECOMMENDED TREATMENT

The recommended treatment depends upon the severity of the loss of circulation. Pills containing up to 30 ppb (85.5 kg/m³) of MESUCO-FIBER or blends of MESUCO-FIBER and other materials are frequently used.

PACKAGING

MESUCO-FIBER is packaged in 40 lb (18.1 kg) net export paper bags.

MISCELLANEOUS

For prices and delivery schedules, contact any Messina office, agent or local distributor.

MESUCO-FIBER is a Messina trademark
