

KLEEN-OIL

LOW TOXICITY BASE OIL

DESCRIPTION

KLEEN-OIL is one of several carefully selected low-toxicity oils which are used as base oils for the formulation of Messina KLEEN-MUL drilling fluid systems. These oils are low in aromatic content, and vary in characteristics such as viscosity, color, flash point, and aromatic content. Messina's KLEEN-OIL products bear differentiating suffixes, based on origin and characteristics.

APPLICATION

KLEEN-OIL is used as the continuous phase in Messina KLEEN-MUL invert emulsion drilling fluids.

PACKAGING

KLEEN-OIL is normally provided in bulk or in 55 gal export drums.

KLEEN-MUL-L is a Messina trademark
