

OILVIS-S

OILMUD VISCOSIFIER

DESCRIPTION

OILVIS-S is an oil-dispersible, non-gel-forming, amine-treated sepiolite clay for use in oils and oil muds. The product is a cream-colored powder.

APPLICATION

OILVIS-S imparts suspension and carrying capacity properties to Messina OILMUL, TRU-OIL, and KLEEN-MUL systems, while having little effect on thixotropic properties. OILVIS-S is also compatible with all other oil-base and invert emulsion mud systems.

RECOMMENDED TREATMENT

Treatment is dependent upon characteristics of the specific mud system being treated, and should be based on pilot tests. Typical treatment levels range from 2 to 8 ppb (6 to 23 kg/m³). A Messina Technical Service Representative can assist with specific recommendations.

PACKAGING

OILVIS-S is packaged in 50 lb or 25 kg multi-wall paper bags.

OILVIS-S is a Messina trademark
