

OIL AID-WE-10 HIGH TEMPERATURE EXTENDER

DESCRIPTION

OIL AID-WE-10 extends the functional performance of polymer gellants to temperatures 75-100° F above their normal limits. Its properties are:

Form Dark, amber liquid
Specific Gravity at 70° F 1.125
Flash Point, TCC None
Pour Point -47° F
Viscosity at 70° F 130 cps
pH 10.5

APPLICATION

OIL AID-WE-10 is designed to retard the thermal, oxidative, and hydrolytic degradation of polysaccharides and cellulose polymers, like those in Messina's line of OIL AID-WG Water Gellants.

RECOMMENDED TREATMENT

1 to 4 lb of OIL AID-WE-10 per bbl of fluid (24 to 96 lb per 1000 gal) is recommended, depending on temperatures to be encountered and exposure time of fluid to elevated temperatures.

HANDLING

Goggles should be worn while handling OIL AID-WE-10. Contact with the eyes could cause minor corneal injury. In case of contact, flush eyes thoroughly with water and call a physician.

PACKAGING

OIL AID-WE-10 is packaged in 5-gal pails and 55-gal drums.
