

MTE - CONSTANT SPEED MIXER

MODEL No. CMNT-007

DESCRIPTION

The MTE Constant Speed Mixer is designed to mix cement slurries according to the procedures outlined in API Specification 10. The Constant Speed Mixer is engineered to maintain constant speed regardless of the torque which is exerted on the mixing blade. Studies by the API have concluded that this greatly increases the reproducibility of thickening time tests. The MTE Constant Speed Mixer incorporates the following features:

- Constant Speed Operation
- Hardened Mixing Blades
- Programmable Selection of Mixing Speed
- Microprocessor Controlled
- High Quality Industrial Grade Mixer
- Stainless Steel One Quart Container
- Available in 115 volt, 60 Hz configuration or 220 volt, 50 Hz Models
- Electronic Timer

CERTIFICATION

The MTE Constant Speed Mixer is certified by Messina Incorporated to be free of manufacturing defects prior to shipment. Each unit carries a warranty for a period of one year after purchase which may be extended at the buyer's option. Shipping dimensions are 15" X 14" X 28", and the unit weighs approximately 45 lbs.
