

MUD GAS SEPARATOR

Mud Gas Separator in Assembled Position

Mud Gas Separator in knocked down position for easy transport

High Efficiency-High Capacity

THE RIG OIL LLC Mud Gas Separator has been designed to capture and separate large volume of free gases within the drilling fluid. Designed for high pressure wells, this unit controls the circulated gas to the surface separating the gas from the mud and vent it.

Exceptional Reliability

Simplicity is the essence of every design.

This 4' x 12' Mud Gas Separator with 8" lines (top flow line, drain line, return line, and 2 high pressure lines) all connections to the separator are fitted with 8" flanges. High pressure lines fitted with 4" Balon valves. (4' x 18' is also available)

- Liquid Capacity : 1000-1,500 gpm
- Gas Capacity : 17.5 MMscf/d
- Working Pressure : 125 psi

This reduces the threat of toxic and hazardous gases

Lowest Maintenance Cost

RIG OIL LLC equipment has the lowest operational and maintenance costs in the industry.
